

FamilySearch.org

One World Tree

FS Goal: One complete, accurate record for every person ever born.

What's new at **familysearch.org**?

The new personalized homepage.

1. Familysearch shows you the latest project they have finished.
2. You can see the latest photos and stories attached to anyone on your family tree from 'Memories.'
3. See and add new sources straight from the homepage.

Familysearch is making it easier than ever to connect with others searching your relatives.

Send messages through FS even when they don't leave an email.

Every photo, story and document added by anyone to a person on your tree will show up on that ancestors' person page. And you can contact the submitters and watch any changes.

Familytree lite offers a streamlined view of your family tree. A simpler site means a faster connection and less data used. Going back to the basics can show you errors and missing information.

As of August 31, 2017 are no longer able to cost!). Familysearch adds microfilms each day! The goal is to have all the microfilm digitized and online by 2020.

Keep checking back to see the newest batches digitized. If you have a particular film you want to see, you can now contact FamilySearch.org and have your film moved to the top of the list!

family.me, a new app partnering with FamilySearch has created a private social media network specifically for families. It works on both desktops and mobile devices. Download your familytree from FamilySearch.org and invite family members to add their up-to-date photos.

FamilySearch is spending most of its time and resources on indexing records, scanning books and digitizing all microfilm. AND on **Mobile Apps!** Here are the latest and greatest.

The most complete family histories use a wide variety of resources.

Use the FamilySearch Memories App to record oral histories. FamilySearch has 2 **FREE Apps**- Family Tree and Memories.

In the FamilySearch Tree App there are now a few new features- Relatives Around Me and Map My Ancestor.

How to use Relatives Around Me for iOS.

How to use Relatives Around Me for Android.
